SUMMARY

Python backend and data developer with 3+ years of professional experience. At Sixtema I built end-to-end Python data pipelines with Airflow and FastAPI; today, at Nazaries, I take over legacy Django REST APIs on PostgreSQL and bring them up to current standards. I'm focusing my career on data engineering.

Outside work I enjoy side projects, either to experiment with new technologies or as learning projects to improve. I'm also studying Applied Data Science at UOC.

EXPERIENCE

Nazaries Jun 2025 – Present
Backend Developer

- Take over legacy Django REST APIs for public-sector clients, work out what they actually do, and refactor them up to current engineering standards.
- Maintain them in production, with PostgreSQL as the primary data store.
- Also contribute to separate search projects built on Elasticsearch.

Sixtema May 2023 – Jun 2025
Data Developer *Aug 2023 – Jun 2025*

- Built end-to-end Python data pipelines, orchestrated with Airflow, for dairy-industry and cybersecurity clients.
- Modelled and queried the data in PostgreSQL.
- Ingested data from external APIs and ZeroMQ message streams.
- Exposed the processed data through FastAPI and Flask services.

Web Developer Intern *May 2023 – Aug 2023*
Developed web pages using CakePHP.

SIDE PROJECTS

central-pipeline
Central data pipeline for all my home automation and IoT projects: Go ingestion over MQTT into PostgreSQL, modelled with dbt in bronze → silver → gold layers.
Go · dbt · PostgreSQL

aws-failover
A failover on AWS (Lambda, EC2, S3 and SSM, deployed with SAM).
AWS SAM · Lambda · EC2 · S3 · SSM · Python
